MULTI-PURPOSE RAILWAY INSPECTION TRAILER

ROAD/RAIL

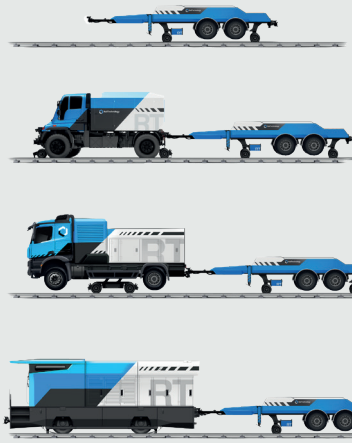

T-Inspect

T-Inspect Railway Inspection Trailer (Road/Rail)
Multi-purpose road rail railway inspection trailer.

RailTechnology

Product description:
The T-Inspect road/rail railway inspection trailer is suitable to be towed behind a variety of vehicles. The trailer is easy to mobilize/transport via road and can be ontracked within minutes. The T-Inspect can be fitted with a variety of railway diagnostics and inspection systems. The T-Inspect trailer can be customized depending on weight axle load, clearance and curve radius requirements.

Applications:
- Monitoring of railway tracks
- Loaded track geometry measurements in line with EN13848 standards
- Rail profile and corrugation measurements
- Assessment of mobile rail treatment results e.g. rail grinding and milling
- Visual assessment of track condition
- Inspection of ballast condition (GPR)
- OLE inspection
- Tunnel scan and clearance assessment
- Other railway inspection technologies (optional)

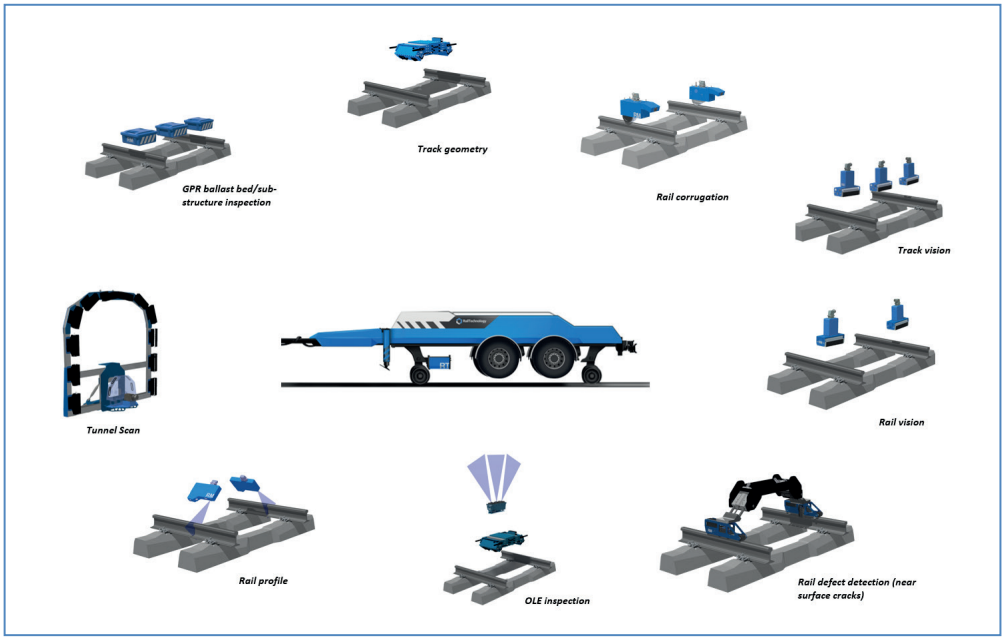

Main characteristics:
- Easy to mobilize
- Relatively simple installation and setup
- Suitable for any track gauge
- For Tram, Metro and Mainline railways
- Multi functional
